élan
LED Light

The élan™ features 224 LEDs that create beams, which rotate and crisscross, and mid-air effects. A 70° beam angle allows wide room and floor coverage. The élan™ offers four channels of DMX control (red, green, blue and strobe), with a plethora of preprogrammed color changes and patterns. Separate knobs control sound sensitivity for movement and color independently, allowing for a variety of show options. To see a video go to: <http://www.chauvetlighting.com/elan.html>
